

Forthcoming orders will update professional responsibilities for the entire MP chain of command, clarify PS review processes under NDA Part IV and provide a framework to improve compliance with the latest legal standards across the MP Gp. The orders will also introduce a new system for the effective and efficient informal resolution of public complaints for MP misconduct, whenever possible.

### **Response to the Auditor General Report on Administration of Military Justice**

The 2018 Report of the Auditor General of Canada relating to the administration of Military Justice noted that “The CAF should establish formal communication processes to ensure that the MP, the DMP, the JAG’s legal officers, and the military units receive the information that they need to carry out their duties and functions in a timely manner.”

One of the measures adopted to address this was the creation of a new full-time position for a legal advisor to provide direct support to the CFMPA. This is an important milestone in providing legal support to the CF MP Gp. The legal officer assigned to the CFMPA has already commenced the review of existing courseware in conjunction with a colleague from the Military Prosecutions Service.

Similarly, all new course material will benefit from an internal military lawyer to increase the quality of the course material, the accuracy of its legal content, and the professionalization of every MP and MPO graduating from a CFMPA course or program.
